

Tammie Gregori
Introductory Bio
April 24, 2017

Tammie Gregori began doing genealogy in January 2014 and joined the LCGS soon After. Genealogy has become her passion and favorite pastime.

She was born and raised in Iowa, in a Quaker family She received a Bachelor's Degree from Iowa State University in Botany and a Master's Degree from the University of Minnesota in Plant Breeding and Genetics. She worked for a time in the Recombinant DNA Lab at the University of Iowa doing genetic research. Some of that research resulted in a patent from which she enjoyed royalties for 17 years. She and her husband and two children moved to Fort Collins in 1991.

It has been her pleasure to combine her interest in genetics with her interest in genealogy.

She and most of her family have done DNA testing at all three major companies.

In January of this year, she attended the Salt Lake Institute of Genealogy week-long Course: DNA Boot Camp: Practical Application.

She believes that understanding the science behind the DNA testing will help you get more out of your results.
